

Stainless Steel Torsion Springs

Rust-Proof

Manufactured with tough 302 stainless steel wire for complete rust-free qualities in any environment

Longer Lasting

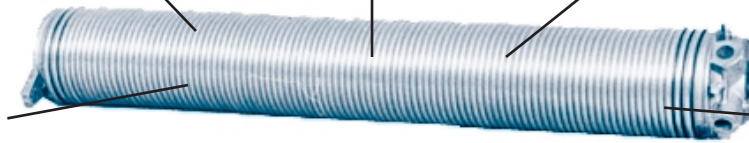

Choose up to 100,000+ cycle for more service time and less replacement.

Variety

Offered in 2", 2-5/8, 3-3/4" and 6" Diameters and a large selection of wire sizes.

Clean

Stainless steel wire eliminates rusty drip-down in wet and corrosive areas

Maintains Torque

Maintains constant torque over the cycle life-time of the spring.

Galvanized Torsion Springs

Corrosion Resistant

Hot-dipped, zinc galvanized steel reduces rust and corrosion.

Longer Lasting

Computer engineered to last 22,500 cycle standard, double the industry standard. 50,000, 100,00 and other high cycle life available for frequently used doors.

Variety

Same-day shipment on hundreds of sizes. 2", 2-5/8" and 3-3/4" diameters available.

Coded

Color-coded paint stripe for fast identification and easy winding count.

Clean

Hot-dipped, zinc galvanized steel reduces ugly drip-down associated with high moisture areas.
