Air-Powered Garage Door Operators

**Designed Specifically for
Your Wet, Corrosive and
High Use Environment...**

Unlike any other product of it's kind in the market, NuMax™ operators are designed with your wet and rigorous application in mind.

Ideal for specialty applications where reliability and durability are absolutely critical, NuMax™ Operators will not only create, but will also help you maintain a profitable and trouble-free business operation year after year.

Benefits

- **Fast**
Cycles 3 Times Faster than Electric
- **Reliable**
Designed for High Cycle Applications
- **Durable**
Handles Wet and Corrosive Areas
- **Long Life**
Built for Continual High Cycle Use
- **Low Maintenance**
Less Seals and Working Parts to Wear

Completely **FIELD SERVICEABLE**

New field serviceable design ensures easy, hassle-free replacement of seals and other repair components in the field without sending the unit in to the factory for repair or service.

Better Design... Better Performance...

Magnetically Coupled

Magnetically coupled design eliminates the need for external seals and has fewer repair components equating to less maintenance and less cost when servicing down the road.

Exhaust Only

NuMax™ operators feature an intake-free operation with exhaust only actuation. Prevents freeze-ups from moisture typical with other products on the market.

Direct Drive

Connecting directly to the door sections, NuMax™ operators will greatly reduce the likelihood of cable spooling and other malfunctions due to freezing, dirt, debris or natural door design tendencies.

Cushioning Spring Limit Assembly

Cushions end of open cycle and allows you to set open limit anywhere.

Cushioning Spring Assembly
