

Survivor & Ultraclear Powder Paint Frame Finish

3-1-2022

Add additional durability and enhance the appearance of your Survivor Polycarbonate or Ultraclear Glass garage doors with our tough and great-looking powder painted frame option.

Corrosion resistance, unmatched durability and high reliability are what makes American Garage Door Supply's specialty garage door products the most recognized in the industry. Now, make them the most attractive by selecting our great-looking painted frame option. It's the perfect choice to help your doors compliment your buildings surroundings or to match your marketing or building color theme.

Provided with TGIC Polyester powder and applied in a controlled, high-quality powder paint process, this option provides a smooth, great-looking appearance and adds super weatherability, corrosion resistance, and excellent chemical resistance in one great finish.

Choose from several standard colors (below) or choose from dozens of custom colors to match your specific specifications and give your operation the curb appeal it deserves.
