Polycarbonate Doors

5 YEAR
WARRANTY

WINDLOAD RATED TO
110 mph

The Polycarbonate Door with all the benefits:

Unsurpassed Durability

Constructed of the toughest corrosion resistant materials available. Survivor™ doors feature state-of-the-art materials to provide maximum life and durability in the most demanding environments.

Reliable Operation

Designed for harsh, high use applications. Survivor™ doors superior design, materials and hardware ensure smooth, easy operation year-after-year.

Low Maintenance

Engineered and manufactured for minimal maintenance and service. Reduces annual costs and more profit for you.

Attractive

Distinct appearance attracts customers and enhances your building appearance. Clear, translucent design maximizes bay visibility and provides around-the-clock customer security & comfort.

Complete Weather Protection

Protects customers, vehicles, building interior and equipment from wind, cold weather and other hazards. 5 X-wall sections offer thermal protection in any climate.

Advanced Materials... Superior Product.

5/8" Five X-Wall Polycarbonate Panels

Tough, shatterproof, translucent polycarbonate panels are corrosion resistant and virtually indestructible. Polycarbonate panels allow high visibility and are easy to maintain.

Aluminum Alloy Frame

Corrosion resistant aluminum stiles and rails provide a strong, durable frame. Uniform frame thickness for better fastener holding power. Available in powdercoat or anodized finish to match your color scheme.

Beveled Aluminum Rails

Tongue & groove and beveled meeting rails shed moisture and eliminate watertraps.

Double Panel Seal

Double panel seal provides protection from moisture infiltration.

- Torsion Spring Models- Galvanized Steel

Choose From 3 Counterbalance Systems

• Strap Counterweight

Featuring a durable, rust-proof spool, aluminum winding hub, counterweight, guide tube and tough, virtually unbreakable reinforced nylon strap, this model offers you hundreds of thousands of cycles of smooth, quiet, and dependable operation of your door system in the most demanding conditions. The best selection for automatic car washes and other highly corrosive, high cycle situations where maximum life, low maintenance and reliability are essential. Totally adjustable. Best used with automated doors.

• Cable Counterweight

The cable counterweight models feature an aluminum counterweight drum, counterweight, guide tube and stainless steel non-rotating cable for smooth, reliable operation of your door cycle-after-cycle in rigorous conditions. Use for doors that require a counterweight system and are oversized or match your existing systems. Best used with automated doors.

• Rust-Resistant Torsion Springs

Excellent for either manual or automated door systems, our high cycle spring models offer over 100,000 cycles of safe, smooth and perfectly balanced operation. Choose either our standard hot-dipped galvanized wire for standard protection or upgrade to totally rust-resistant stainless steel wire. Spring models provide you with 100% perfect balancing with no jarring and less cable spooling.

*Bronze models provided with 12,000 cycle springs only

What Makes Survivor™ Products Better? Quality Components.

The Pioneer of Stainless Steel Track & Hardware

Heavy duty stainless steel track and hardware were developed to give you the toughest rust-proof qualities in the industry. Select our Gold or Platinum models to ensure your door will withstand the test of time in the most punishing environments.

Incredibly tough, wear and crack resistant, our 3" track, bearing plates, bearings, shaft, cable, fasteners, 12ga. face hardware and pusher springs are manufactured with high quality 304 grade stainless steel. Provides you with the rust-free durability you need in wet, corrosive environments. 316 grade stainless steel also available.

High Quality Rollers

Select from the "Original" or "Supreme" Magnum™ roller designs or choose our bearingless rollers to match the performance, reliability and durability you need in your unique application and exposure.

Choose our "Supreme" Magnums with stainless steel bearings for the best in rust resistance and dependability or select the "Original" Magnum rollers, which have set the industry standards for over three decades. Bearingless rollers are optional on all models to give you years of use in tough, corrosive environments.

Outstanding Options

• Full Vision Sections

Select our crystal-clear 5/8" Plexiglas™ full vision sections for maximum visibility, comfort and security.

• Powder Coat/Anodized Finish

Match your color specifications with a tough, appealing powder-coat or anodized frame. Choose from a variety of colors to match your special theme.

• Conveyor Cut-Outs

Custom designed for perfect alignment with your conveyor system.

• Hinge Gasket Option

Add hinge gaskets for under your stainless steel hardware for additional bi-metallic corrosion protection. Included in Platinum hardware models.

• Specialty Coated Shaftline Components

Add years to the life of your counterbalance assembly with our specialty coated drums, cones and couplers.

• Polycarbonate Color Options

Choose from a variety of polycarbonate panel colors including: Clear (standard), Blue, Green, Bronze or Opal to match your color theme
